SUGGESTIONS

WHEN ordering goods, catalog numbers should be used whenever possible.

To avoid errors, always state whether goods are to be shipped by freight, express or otherwise.

All claims for shortage must be made within five days after receipt of goods.

No goods to be returned without first obtaining our consent and shipping instructions.

The prices given in this catalog are subject to change without notice.

NOTE

Globes with 6″ Fitter can be used on these Fixtures instead of Reflectors.

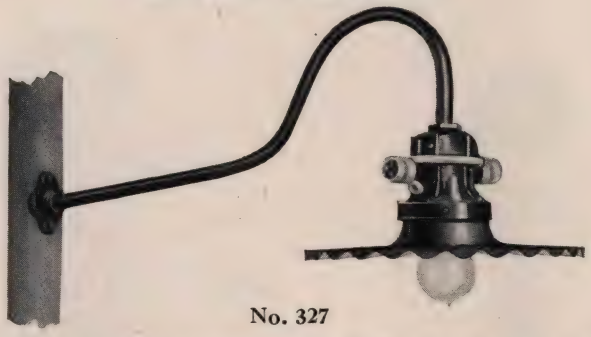
Prices on Application

These units are designed for the operation of Series Type Lamps of 100 C. P. and smaller, through a constant Potential Transformer having a Secondary Winding equal to the total voltage of the lamps in series. With this System a current regulator is not required.

The Coil shown at the top of the Fixture is shunted around the lamp, so that in case a lamp fails, the drop in voltage is automatically provided for, the resistance of the Coil being equal to that of the lamp. With lamps out up to 30 per cent. of the number in circuit, voltage on the remaining lamps will not vary more than 2 per cent. from normal.

Always specify Candle Power and Amperes of lamps to be used.

Series Fixtures



No. 327

327 For Exterior Wires, complete with ¾″ x 3½′ Arm, Pemco Mogul Base Series Socket and No. 314 eighteen-inch Reflector, for lamps of 100 C. P. and smaller.

Compensator Fixtures

Equipped with No. 312
Bowl Type Reflector

Prices on Application

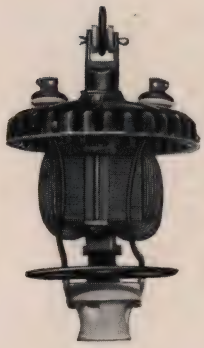
Fixtures listed with Series Compensators can be furnished with coils wound for 4, 5.5, 6.6, or 7.5 Ampere Circuits. If so desired, coils can be furnished with taps for both 15 or 20 Ampere Lamps.

MULTIPLE COMPENSATORS are furnished for 110 volts with 105, 110 and 115 volt taps brought out to a terminal block. Taps are also brought out to the terminal block providing the proper voltage for either 600 or 1000 C. P. Lamps.

These Units make possible the use of the more efficient Series Type Lamps on Multiple A. C. Circuits. Can be furnished with nut at top for attaching direct to pipe or Bracket Arm, instead of Hanger, when so desired.

For further information regarding these Fixtures, see pages 22 and 23.

Compensator Fixtures



The above illustration shows how coil is supported in our Compensator Type Fixture. The plate above the receptacle fits snugly inside the casing and prevents any movement due to vibration or swinging.

The Pins shown on the Collar engage with Lugs inside the Casing, thus providing a positive support. To remove the Globe or Refractor, it is only necessary to loosen one screw, raise slightly and turn.

PEMCO FIXTURES, shown above and on pages 22 and 23, are furnished with Series or Multiple Compensator, Series Film Cutout Socket, or with Multiple Mogul Socket for operation with Current Transformers, and are designed to meet the requirements of the higher Candle Power Type "C" Lamps. Ventilation is provided at the top, around the globe collar and through the opening at the bottom of the globe. The casing is heavy spun copper, and the cast-iron top is provided with insulated hanger and binding posts of ample size.

The glassware furnished is most efficient, and produces a pleasing effect. The reflector used with these fixtures is attached to the casing independent of the globe, and does not in any way interfere with the removal of the latter.

1111 Mica Films for Pemco Series Socket.

Catalog Number	Code	Weight	Standard Package	LIST PRICES
1000	Blubber	1¾	50	$2.00
1100	Bluing	1		1.00
1101	Bluster	¾	100	1.00
1110	Boaster	½		.35
1111	Bodkin, per hundred		100	.80

This Socket is so designed that in case of an open circuit, owing to the lamp breaking or burning out, it will automatically close the circuit. The Receptacle is also provided with a simple short-circuiting device, which closes the circuit as the socket is unscrewed. The socket can be removed at any time for the renewal of the lamp and film; the latter may consist of any convenient form of insulation that will puncture at a maximum voltage of 200 volts, although a thin piece of mica with a small hole is recommended as being the best.

Minerallac Electrically Wound Time Switches

All types of Minerallac Electrically Wound Time Switches are automatically wound by a reliable electric motor operating from line voltage of 110 or 220 either A. C. or D. C. This automatic winding, combined with the rugged clock and switching mechanism, makes it a dependable time switch, which requires no weekly visits for winding. The different types, each of which is briefly described, is housed in a cast-iron weather and dust-proof case, equipped with a heating unit for use in cold weather.

Special Sunday Cut-Out or Skip-a-Day Attachment

This may be added to any type of Minerallac Electrically Wound Time Switch, and makes the switch inoperative during the period when the power is not needed, and may be set for any day or days of the week. For this attachment, add $5.00 to the list price.

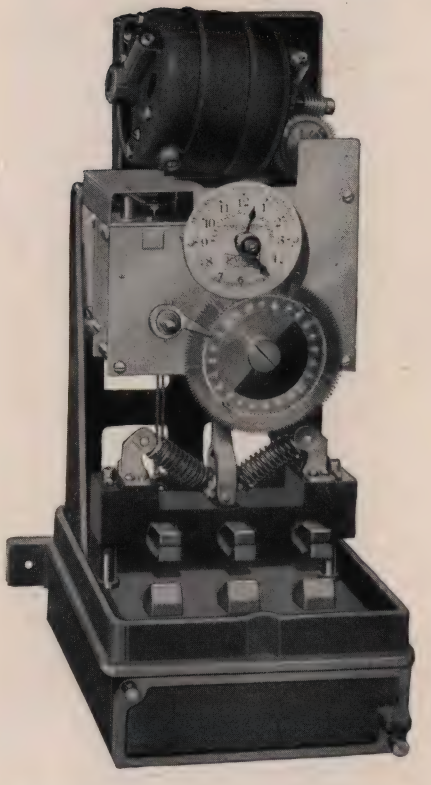
Time Lengthening Attachment

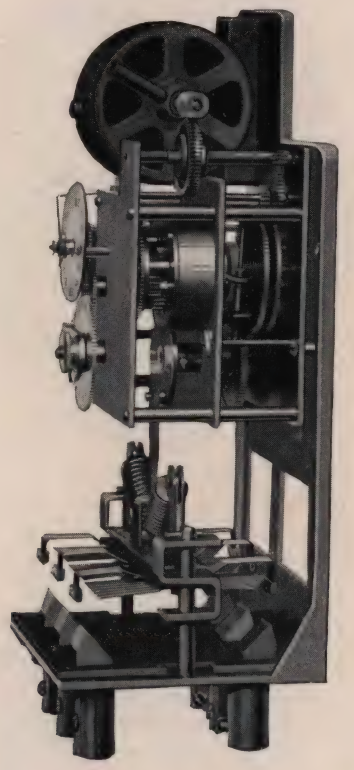
This makes it possible to change the hour of turning off the circuit at a later hour any day or days of the week. As an illustration, it is possible to turn off the lighting circuit at 11 o'clock every night of the week except Saturday, when the lights will be allowed to burn until 12 o'clock midnight. For this attachment, add $5.00 to the net price.

NOTE No. 1—In ordering either of the above attachments, specify the hours during which the circuit is to be closed.

NOTE No. 2—In ordering, always specify the voltage available for motor operation. On 110 or 220 volt switches the motor is internally connected and is furnished for operation on the voltage specified in the order. In high voltage switches the motor leads are brought out separately.

Minerallac Electrically Wound Time Switches





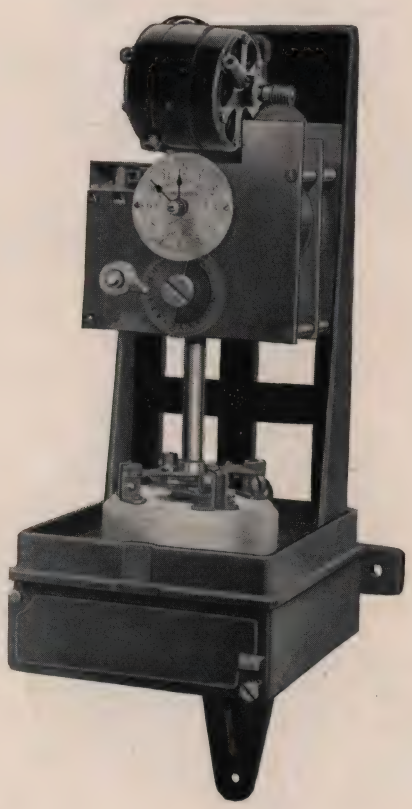
The Type F Time Switch is furnished in either two or three pole, single throw, in capacities of 40 to 100 amp. at 250 V A. C. or D. C.

Type	Code	Description	LIST PRICES
Type F	Yacht	40 Ampere	$45.00
Type F	Yager	80 Ampere	60.00
Type F	Yankee	100 Ampere	70.00

The Type Fd Time Switch is of the same construction as the Type F, except that the laminated copper brushes are so made as to control two circuits, switching from one to the other with no off position. This type is furnished two-pole and has a rating of 20 amp. at 250 V A. C. or D. C.

Type	Code	Description	LIST PRICE
Type Fd	Yawning	20 Ampere	$45.00

Minerallac Electrically Wound Time Switches



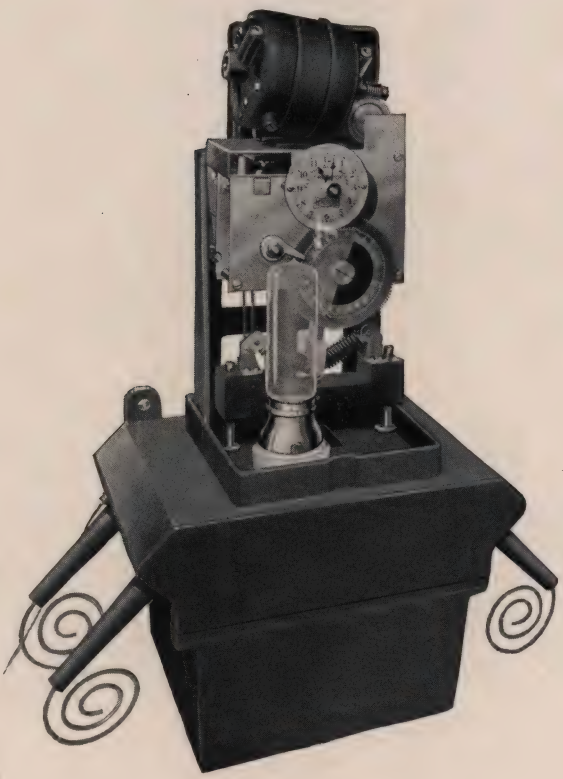
The Type FS Time Switch is of the same rugged construction as the Type F, and is furnished with a snap switch giving switching combinations impossible to obtain with any other type of switch. It can be used to good advantage on a three-wire circuit, turning on all the lights at one time, turning one circuit off at an early hour and the other circuit at a later hour. Furnished with any standard snap switch.

Type	Code	LIST PRICE
Type FS	Yule	$45.00

NOTE

Special switching combinations and prices furnished upon request.

Minerallac Electrically Wound Time Switches



Type Fo Time Switch is an oil break switch for voltages up to 4800. The switch elements are of the approved laminated brush type, with auxiliary contacts to take care of the Arc.

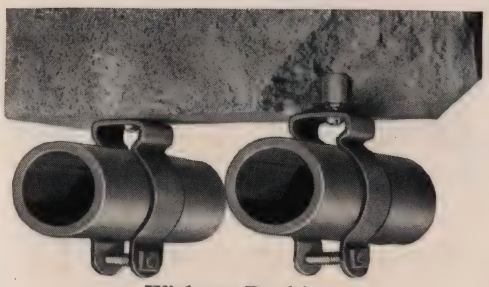
Minerallac Cable and Conduit Hangers

With and Without Bushings



Without Bushing

With Bushing

Approved by the National Board of Fire Underwriters

These Hangers are made of the best spring steel, and are easily and quickly put in place. It is necessary to drill but one hole. Porcelain Bushings can be used for high-tension work.

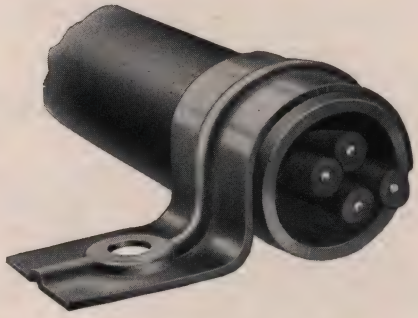
For broken packages, add 20 per cent to list prices.

No. 6 Bushing is impregnated wood.

If Galvanized Finish is desired, add $1.00 to above list.

Jiffy Clips



The Jiffy Clip is made to afford great strength without being heavy or bulky, by having a rib drawn in the center of the clip.

A boss is provided where the screw or bolt passes through, which also acts as a lock washer, thus preventing the clip from working loose.

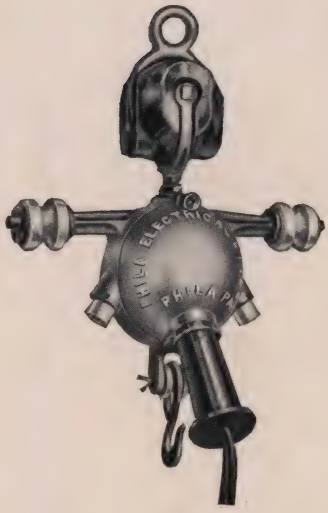
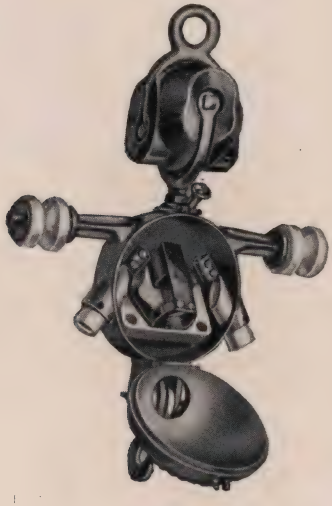
PEMCO

MISCELLANEOUS

Absolute Cut-outs



No. 501



No. 501
Interior View

Pemco No. 501 Absolute Cut-out is a safety device by which any Series Lamp may be cut out and absolutely disconnected from the circuit. There are no delicate or complicated parts, and the mechanism is simple and positive in its operation.

The improved interlocking Porcelain Insulator at the top provides ample insulation, and the cut-out is furnished complete as shown.

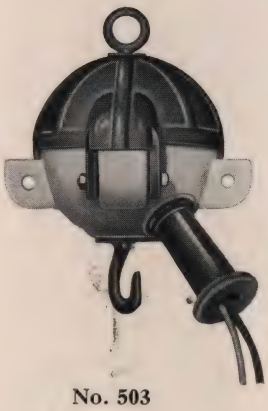
The enclosing iron case is thoroughly galvanized and water-proof.

Length from Suspension Eye to Lamp Hook, 15″.

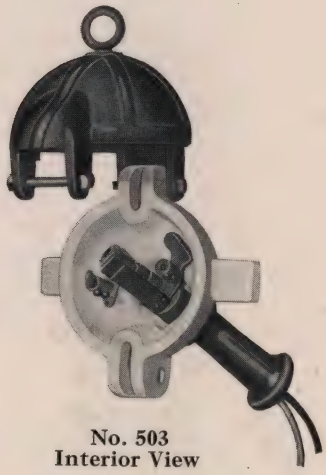
Catalog Number	Code	Weight	Description	LIST PRICE Galvanized
501	Daffodil	11	Complete with Plug	$6.00

For Parts, See Page 117

Absolute Cut-outs



No. 503



No. 503
Interior View

Pemco No. 503 Absolute Cut-out is used in the same manner as the No. 501, shown on page 114.

The porcelain forming the bottom portion of this Cut-out carries the switch and also provides ample insulation, thereby avoiding the necessity for an insulator at the top.

Length from Suspension Eye to Lamp Hook, 10″.

Catalog Number	Code	Weight	Description	LIST PRICE Galvanized
503	Inboard	13	Complete with Plug	$7.00

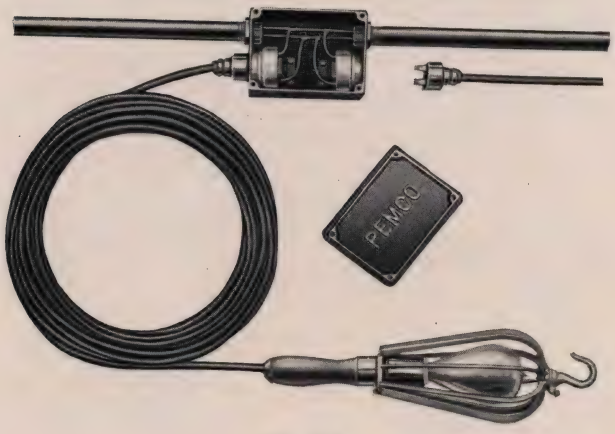
Platform Boxes



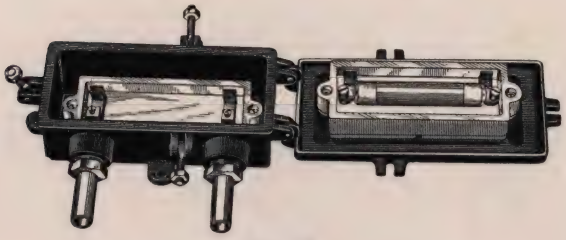
No. 163

Catalog Number	Code	Weight	Description	LIST PRICES Japanned	Galvanized
163	Glosser	6	Platform Box, complete with two Plugs, but without Cord or Lamp	$4.50	$4.90

NOTE

This Box is designed to provide a convenient and easy method of car lighting for freight handlers in depots, terminals, warehouses, etc. The Boxes are weather-proof and usually located under the projection of the loading platforms, where they are readily accessible for plugging in the lamps. The service is brought to the Boxes through conduit in the usual manner, so that the wires are not exposed, thus affording a construction that is both substantial and safe. Each plug is fused so that in case of a short circuit in a cord no other lamps are affected.

Fuse Boxes



No. 76
Subway Type—2500 Volts

Pemco Fuse Boxes are made to take fuses 7¼″ or less between centers. The Subway Type is provided with brass unions for attaching to lead-covered Cables and are absolutely water-proof. The Pole Type is furnished with Porcelain Entrance Bushings of ample size, and is arranged for mounting on Porcelain Knobs.

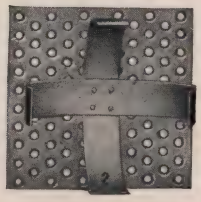
Conduit Sealing Plugs

Temporary Plug for Round Ducts



Permanent Plug for Either Square or Round Ducts

Temporary Plug for Square Ducts

These Plugs are designed to take the place of wood, and have the following advantages:

They cannot break the end of the conduit by being driven in too tight or swelling up. They cannot work loose and allow the Ducts to fill with water and mud.

They will last indefinitely, as they are made from galvanized iron and rubber.

The springs on the Permanent Plug hold it securely in place until the cement hardens, thus closing the Duct perfectly, and yet it can be readily removed by a few blows from a hammer or trowel.

Catalog Number	Code	Description	LIST PRICES
447	Grange	Temporary Plug for Round Ducts, per 100	$22.00
448	Granule	Permanent Plug for either Round or Square Ducts, per 100	10.00

Prices on Application

Use Pemco Friction Tape

Pemco Black Friction Tape

For general insulating purposes this grade cannot be equaled at any price.

The Fabric used is the highest grade of 56-60 sheeting cotton with a compound carefully prepared from selected rubber.

Yardage, 140 feet per pound. Price per pound. . . . . .

Pemco XX Grey Friction Tape

This grade is made especially for interior work, where friction, strength and wearing qualities are necessary; recommended for armature work.

Yardage, 130 feet per pound. Price per pound. . . . . .

Pemco XXX Black Friction Tape

Has unsurpassed adhesive qualities and tensile strength; is especially adapted for outdoor work on high-tension lines.

Price per pound . . . . . .

Pemco Rubber Splicing Tape

Is an excellent article, made of high-grade materials and intended for general work.

Yardage, 38 feet per pound. Price per pound.....

Pemco XX Rubber Splicing Tape

Is adapted to the most exacting requirements, and we have yet to receive an unsatisfactory report on work done with it.

Yardage, 40 feet per pound. Price per pound.....

Pemco XXX Rubber Splicing Tape

Is the best splicing tape ever offered the electrical trade, and is prepared with a view of withstanding high voltage.

Price per pound.....

NOTE

All grades of Friction and Rubber Tapes are put up in half-pound rolls, ¾″ wide, in printed cartons, each roll wrapped in foil.

Special widths and various size rolls can be furnished without additional cost.

NUMERICAL CODE

The following may be used for coding numerals for figures that would otherwise require more than one word:

1	2	3	4	5	6	7	8	9	0
ba	ce	go	fi	ag	la	ku	ng	th	sm

Dec.—Decimal point

Fra.—Fraction (/)

T—And

Examples

1236 = bacegola

2.85 = cedecngag

½ = bafrace

1½ = batbafrace
